

## **Hazard Mitigation Public Survey #2**

Cochise County, as well as all municipalities within the county, is in the process of an update to the Cochise County Multi-jurisdictional Hazard Mitigation Plan. This plan is updated every five years to address changing needs of the county and to meet Federal Emergency Management Agency (FEMA) requirements. As part of this update process, public input is requested for various areas of interest. Currently we have opened a survey seeking public input regarding preferred mitigation tools and strategies that citizens would like to see their government implement to help reduce future losses from natural disasters. This survey closes on 2/17 and your participation is appreciated. The final draft version of the plan document will be posted soon for public review and comment. Stay tuned for additional details.' The short survey can be taken at: <https://www.surveymonkey.com/r/LKY3NDC>
